Professional Summary

Java Full Stack Developer with internship experience in Java, Spring Boot, Spring MVC, JDBC, MySQL, and Mendix. Skilled in developing REST APIs, MVC-based web applications, and database-driven solutions with strong knowledge of OOP, Collections, and SQL.

Technical Skills

- **Languages:** Java, SQL, JavaScript
- **Technologies:** Spring Boot, Spring MVC, Spring JDBC, JPA, JSP, REST APIs, HTML, CSS, Bootstrap, MySQL
- **Tools:** Mendix Studio Pro, Git, Postman, JUnit, Lombok, Tomcat, IntelliJ IDEA, Eclipse
- **Concepts:** OOP, Collections Framework, MVC, Microflows, Nanoflows, XPath

Internship

Mendix Developer Intern

Three M Software Pvt. Ltd., Pune

May 2026 – Present

- Developing enterprise applications using Mendix Studio Pro.
- Designing Domain Models and implementing business logic using Microflows, Nanoflows, and XPath.
- Working with security, validations, Java Actions, REST integrations, testing, and debugging.

Java Full Stack Developer Intern

Gsoft Solutions Pvt. Ltd., Pune

Aug 2025 – Apr 2026

- Developed Java web applications using Spring Boot, Spring MVC, JPA, and MySQL.
- Built REST APIs and implemented CRUD operations following MVC architecture.
- Worked on authentication, database integration, API testing, Git, and Postman.

Education

- | | |
|--|------------|
| • B.E (Computer Science & Engineering) – Sant Gadge Baba Amravati University | CGPA: 7.75 |
| • HSC – Maharashtra State Board | 69.08% |
| • SSC – Maharashtra State Board | 82.40% |

Projects

Photography Web Application — Spring Boot, Spring MVC, JSP, JPA, MySQL

- Developed a live Photography Web Application (capturecool.co.in) during my internship at Gsoft Solutions.
- Built REST APIs using Spring Boot, Spring MVC, JPA, and MySQL following MVC architecture.
- Implemented Admin and Client modules with secure role-based authentication.
- Developed booking, portfolio, gallery, and session management using JSP.

Leave Management System — Mendix Studio Pro, Microflows, XPath

- Developed a Leave Management System using Mendix Studio Pro for organizational leave management.
- Designed Domain Models, Microflows, Nanoflows, and XPath constraints for efficient business logic.
- Implemented role-based leave approval, validation, and working-day calculation for multiple user roles.
- Integrated email notifications and leave tracking for seamless employee communication.

Certifications

- Mendix Rapid Developer Certification – Three M Software Pvt Ltd (Internship)
- Java Full Stack Development – Giri's Tech Hub
- Introduction to Generative AI – By Microsoft
- Microsoft Copilot Studio – Google Cloud
- Python Workshop – ImagineScript Solutions Pvt Ltd
- Java Developer – Hackerrank
