PROFESSIONAL SUMMARY

Results-driven **Java Full Stack Developer with 2.8 years of experience** in designing, developing, testing, and maintaining enterprise applications using **Java, Spring Boot, Spring MVC, REST APIs, JPA/Hibernate, MySQL, JSP, JavaScript, HTML, CSS, and Bootstrap**. Experienced in developing scalable backend services, MVC-based web applications, database-driven solutions, and RESTful APIs following clean coding and object-oriented programming principles.

Strong knowledge of **Java 8/11, OOP, Collections, Exception Handling, Multithreading, JDBC, JPA/Hibernate, SQL, MVC architecture, Microservices fundamentals, API integration, authentication, and CRUD operations**. Hands-on experience with **Git, Maven, Postman, JUnit, Mockito, Jenkins, Tomcat, IntelliJ IDEA, and Eclipse**. Experienced in Agile/Scrum environments, requirement analysis, debugging, unit testing, code reviews, deployment support, and production issue resolution.

TECHNICAL SKILLS

- **Programming Languages** : Java, SQL, JavaScript
 - **Frameworks & Technologies** : Spring Boot, Spring MVC, Spring JDBC, JPA, Hibernate, JSP, REST APIs, Servlets, HTML5, CSS3, Bootstrap
 - **Databases** : MySQL, SQL
 - **Development & Testing Tools** : IntelliJ IDEA, Eclipse, Postman, JUnit, Mockito, Maven, Git, GitHub, Apache Tomcat
 - **DevOps / CI-CD** : Jenkins, Git, Maven
 - **Architecture & Concepts** : OOP, Collections Framework, MVC, REST Architecture, Microservices, Exception Handling, Multithreading, Design Patterns, Authentication & Authorization, CRUD Operations
 - **Methodologies** : Agile, Scrum, SDLC, STLC
-

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions — Pune, India

Java Full Stack Developer

January 2024 – Present

- Developed and maintained enterprise-grade web applications using **Java, Spring Boot, Spring MVC, JPA/Hibernate, REST APIs, JSP, JavaScript, HTML, CSS, and MySQL**.
 - Designed and implemented scalable **RESTful APIs** for business-critical application modules.
 - Developed backend services using **Spring Boot** following layered architecture and clean coding practices.
 - Implemented business logic using **Java and Spring MVC**, with appropriate validation and exception-handling mechanisms.
 - Developed database-driven functionality using **JPA/Hibernate, JDBC, and MySQL**.
 - Designed and optimized SQL queries for application data retrieval, insertion, updating, and reporting requirements.
 - Implemented **CRUD operations** for multiple enterprise application modules.
 - Integrated frontend components with backend REST APIs for seamless data exchange.
 - Worked with **JSON-based request and response structures** for REST API communication.
 - Implemented authentication and authorization mechanisms for secure application access.
 - Used **Spring Boot configuration, dependency injection, annotations, and REST controllers** to develop modular applications.
 - Developed reusable Java components and service-layer methods to improve maintainability and code quality.
 - Performed unit testing using **JUnit and Mockito** and API testing using **Postman**.
 - Identified and resolved application defects through debugging, log analysis, and root-cause analysis.
 - Used **Git/GitHub** for source-code management, branching, merging, and collaborative development.
 - Used **Maven** for dependency management, project builds, and application packaging.
 - Supported application deployment and troubleshooting across development and testing environments.
 - Worked with **Jenkins** for build and continuous integration activities.
 - Participated in Agile/Scrum ceremonies including **daily stand-ups, sprint planning, backlog refinement, sprint reviews, and retrospectives**.
 - Collaborated with developers, testers, business analysts, and stakeholders to understand requirements and deliver application features.
 - Participated in code reviews and followed development standards, coding guidelines, and version-control practices.
 - Investigated production and UAT issues and provided timely fixes and technical support.
 - Prepared technical documentation related to APIs, application functionality, troubleshooting, and deployment activities.
-

PROJECTS

PROJECT 1: Enterprise Digital Banking & Customer Service Platform

Role: Java Full Stack Developer

Technology Stack: Java 8/11, Spring Boot, Spring MVC, REST APIs, JPA, Hibernate, MySQL, JSP, JavaScript, HTML5, CSS3, Bootstrap, Maven, Git, Jenkins, JUnit, Mockito, Postman

Project Description

An enterprise **Digital Banking and Customer Service Platform** designed to support banking operations such as customer account management, transaction services, service requests, customer authentication, and operational workflows. The application provides secure web-based functionality and REST APIs for communication between frontend, backend, and database layers.

Roles & Responsibilities

- Developed backend modules using **Java, Spring Boot, and Spring MVC**.
 - Designed and implemented **REST APIs** for customer, account, transaction, and service modules.
 - Developed **CRUD operations, business logic, validations, and exception handling**.
 - Integrated **JPA/Hibernate with MySQL** and optimized SQL queries.
 - Implemented **authentication and authorization** for secure application access.
 - Integrated frontend components using **JSP, JavaScript, HTML, CSS, and Bootstrap**.
 - Developed unit tests using **JUnit and Mockito** and tested APIs using **Postman**.
 - Used **Git and Maven** for source control, dependency management, and builds.
 - Supported **Jenkins CI builds, application releases, and deployment activities**.
 - Performed **debugging, defect fixing, and root-cause analysis**.
 - Collaborated with **QA, Business Analysts, and development teams** throughout the SDLC.
 - Participated in **Agile/Scrum ceremonies, sprint planning, testing, and production support**.
-

PROJECT 2: Enterprise Retail & E-Commerce Management Platform

Role: Java Full Stack Developer

Technology Stack: Java 8/11, Spring Boot, Spring MVC, REST APIs, JPA, Hibernate, MySQL, JSP, JavaScript, HTML5, CSS3, Bootstrap, Maven, Git, Jenkins, JUnit, Mockito, Postman

Project Description

An enterprise **Retail and E-Commerce Management Platform** developed to manage customer information, product catalogs, inventory, shopping workflows, orders, payments, and customer service operations. The platform uses a layered architecture with Spring Boot-based backend services and web-based frontend components.

Roles & Responsibilities

- Developed enterprise applications using **Java, Spring Boot, Spring MVC, JPA/Hibernate, and MySQL**.
 - Designed and developed **REST APIs** for customer, product, order, inventory, and service modules.
 - Implemented **CRUD operations, business logic, validations, and exception handling**.
 - Developed database integration and entity mappings using **JPA/Hibernate and SQL**.
 - Integrated frontend components using **JSP, JavaScript, HTML5, CSS3, and Bootstrap**.
 - Implemented **authentication and role-based access control**.
 - Tested APIs using **Postman** and developed unit tests using **JUnit and Mockito**.
 - Used **Git and Maven** for version control and build/dependency management.
 - Supported **Jenkins CI/CD builds, application deployment, and release activities**.
 - Performed **debugging, defect fixing, and root-cause analysis**.
 - Collaborated with **QA and cross-functional teams** during testing and releases.
 - Participated in **Agile/Scrum ceremonies** and sprint activities.
-

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science & Engineering

Sant Gadge Baba Amravati University

CGPA: 7.75
